## Tips on using Canna Bio

- The above feeding schedule should be used as a guide only. You should look for signals from your plant as to whether more or less feed is required.
- Do not adjust the pH of your nutrient solution when growing in soil. There is no need, and by adding acids to your solution you will in fact harm the beneficial organisms present in your soil.
- Canna Bio works well with all major soil growing media available. We have seen exceptional results with both Bio-Bizz All-Mix and Canna Professional Plus Soil Mixes
- The above recommended boosters and additives are suggestions only. Other organic boosters and additives are available and will work equally as well with Canna Bio. Call the Technical Team on 0845 345 5176 for more info on what boosters can be used with Canna Bio.
